CLARIFICATIONS: LEVELS OF DIFFICULTY SINGLES, season 2012-2013

STEP SEQUENCES

Types of turns (executed on one foot) : three turns, twizzles, brackets, loops, counters, rockers.

Types of steps (executed on one foot whenever possible) : toe steps, chasses, mohawks, choctaws, curves with change of edge, cross-rolls, running steps.

Simple variety must include at least **7** turns & **4** steps, none of the types can be counted more than twice.

Variety must include at least **9** turns and **4** steps, none of the types can be counted more than twice.

Complexity must include at least **5** different types of turns and 3 different types of steps all executed at least once in both directions.

Use of upper body movements means the visible use for a combined total of at least 1/3 (instead of 1/2) of the pattern of the step sequence any movements of the arms, head and torso that have an effect on the balance of the main body core.

Two combinations of difficult turns are considered to be the same if they consist of the same turns done in the same order, on the same edge and on the same foot.

At least half a pattern on one foot is no longer a Level feature.

SPINS

Positions. There are 3 basic positions: camel (free leg backwards with the knee higher than the hip level, however Layback, Biellmann and similar variations are still considered as upright), sit (the upper part of the skating leg at least parallel to the ice), upright (any position with skating leg extended or slightly bent, which is not a camel position) and non-basic positions (all other positions formerly called as intermediate positions).

Spin combinations: the number of revolutions in non-basic positions is counted in the total number of revolutions; non-basic positions can be considered as difficult variations in accordance with the definition of such variations, but a change of position can only be from one basic position to another basic position.

Spin in one position and Flying Spin: non-basic positions are allowed, counted in the total number of revolutions required by the Rules, but are not valid for Level features.

Change of edge in order to be counted requires at least 2 full rev. on one edge followed by at least 2 full rev. on another edge in the same basic position.

Spin Variations.

Simple: A simple variation of position is a movement of a body part, leg, arm, hand or head, which enhances but does not change the basic position of the main body core. A simple variation does not increase the Level.

Difficult: A difficult variation is a movement of a body part, leg, arm, hand or head, which requires more physical strength or flexibility and that, has an effect on the balance of the main body core. Only these variations can increase the Level.

Jump within a spin without changing feet and Clear increase of speed in camel, sit, layback or Biellmann position are no longer considered as difficult variations, but they are considered as separate features.

Flying spins/entrances: in case of a “step over” in Short Program Level cannot be more than 1, in Free Skating this does not count as a Level feature; in a flying sit spin “landing on the same foot as take-off or changing foot on landing” is counted as a Level feature only when the position is attained in the air.

In Free Skating normal flying camel entry does not block a possibility of counting a difficult flying entry as a Level feature.

Backward entrances: in order to be counted as a Level feature a backward entrance requires at least 2 rev. on a backward outside edge.

Spins in both directions: Execution of spins in both directions (clockwise and counter clockwise) that immediately follow each other will be rewarded by counting this as an additional feature in all Levels for sit and camel basic positions. A minimum of 3 revolutions in each direction is required. A Spin executed in both directions (clockwise and counter clockwise) as above is considered as one Spin.

Change of foot to be considered requires at least 3 revolutions before and after the change.

For Spins with change of foot at least one basic position on each foot is mandatory for Levels 2 – 4 both in Short Program and in Free Skating. For spin combinations all 3 basic positions are mandatory for Levels 2-4 both in Short Program and in Free Skating.</p>

CLARIFICATIONS: LEVELS OF DIFFICULTY PAIRS, season 2012-2013

LIFTS

Positions:	Upright (lady's upper body vertical), Star (lady's position sideways with upper body parallel to the ice) and Platter (lady's position flat, facing up or down with upper body parallel to the ice)
Simple: Take-off	Includes but is not limited to change of hand hold on ascent of lift.
Landing	Different landing foot (<u>not automatically considered</u>), change of hold on descent.
Carry	Duration at least 3 seconds with no revolution of the man.
Difficult: Take-off	Includes but not limited to: Somersault take-off, dance lift going immediately into a Pair lift take-off without the lady touching the ice between two lifts, one hand take-off, Spread-Eagle, Ina Bauer or Spiral by one by one or both partners as the entry curve. Inside Axel take-off in 5ALi and 5SLi is considered as a difficult variation of the take-off.
Landing	Variation of the difficult landing which includes but is not limited to: Somersaults, variation in hold, partner positions and /or direction of landing, one hand landing, Spread-Eagle position of the man during dismounting. Landing on the other foot is not automatically considered as a simple landing variety. Inside Axel take off in 5ALi and 5SLi is considered as a difficult variation of the take off.
Carry	Includes at least one of the following features: during the carry the man for at least 3 seconds skates on one foot or holds the partner on one arm or performs crossovers or performs Spread Eagle or a similar move.
Position	A movement of a leg(s), arm(s) or upper body which requires more physical strength or flexibility and that has an effect on the balance of the main body core. Only these variations can increase the Level.

Change of hold or lady's position requires one full revolution before and after this change. If a change of hold and a change of lady's position are executed at the same time, only one Level feature will be awarded.

Difficult variation of the lady in any of the 3 basic positions can be awarded only once per program.

TWIST LIFTS

New feature (n° 5): after the man releases the lady, his arms must change position along to the side of his body at least as low as his shoulders before he catches the lady.

STEP SEQUENCES

Types of turns and steps: see single chart.

Simple variety must include at least 7 turns & 4 steps, none of the types can be counted more than twice.

Variety must include at least 9 turns and 4 steps, none of the types can be counted more than twice.

Use of upper body movements means the visible use for a combined total of at least $\frac{1}{3}$ of the pattern of the step sequence any movements of the arms, head and torso that have an effect on the balance of the main body core.

Crossing at least 3 times of the partners for at least $\frac{1}{3}$, but not more than $\frac{1}{2}$ of the sequence.

PAIR SPINS

Entrance from backward outside or inside edge requires that each partner rotates at least two (2) revolutions on a backward outside/inside edge.

Execution of 3(4) difficult variations: each partner must execute at least 1(2) variation(s). Only 1 of the variations can be in non-basic position. These features do not depend on the order in which variations are executed.

DEATH SPIRALS

Lady's "low" position: for inside Death Spirals the lowest hip or buttock and head should not be higher than her skating knee; for outside Death Spirals – head should not be higher than her skating knee and bodyline between knee of skating leg and head should be flat or shallow arch.

If during the Death Spiral lady's head **never** reaches the level of her skating knee, Death Spiral will have no value.

Man's "low" pivot position: buttocks not higher than the knee of the pivot foot.

Any part of the Death Spiral with a higher lady's or man's position is not valid for Level features 2) and 3).

Change of arm hold by the lady or man requires one full revolution in the death spiral position before and after this change. However if both partners change arms at the same time, only one Level feature will be awarded.

Entry, exit:

Difficult entry to a death spiral should be on the curve and on the leg of the death spiral and while acquiring the actual death spiral position there should be a continuous and not too prolonged movement to this position.

Entry commences at the beginning of entry curve when one or both partners are already on one foot on the edge of the death spiral.

Exit starts when the Man starts bending his "holding" arm in the elbow and ends when the Lady comes to the vertical position.

III. Updated Guidelines for marking +GOE of Single/Pair Elements (positive aspects)

These guidelines are tools to be used together with the minus GOE charts. The final GOE of a performed element is based on the combination of both positive and negative aspects. It is important that the final GOE of an element reflects the positive aspects, as well as any possible reductions that may apply.

The final GOE of an element is calculated considering first the positive aspects of the element that result in a starting GOE for the evaluation. Following that a Judge reduces the GOE according to the guidelines of possible errors and the result is the final GOE of the element.

To establish the starting GOE Judges must take into consideration the bullets for each element. It is at the discretion of each Judge to decide on the number of bullets for any upgrade, but general recommendations are as follows:

FOR + 1 : 2 bullets

FOR + 2 : 4 bullets

FOR + 3 : 6 or more bullets

Remarks:

1. Lifts, twist lifts and death spirals (pairs), spins and steps (singles and pairs) are divided depending on their difficulty in five (5) Levels according to the number of features achieved: Basic Level (B) – in case of no features, Level 1 – in case of one feature, Level 2 – in case of two features, Level 3 – in case of three features and Level 4 – in case of four or more features (S&PTC Congress proposal).
2. Group 5 Backward Lasso Lift (5BLi) is defined as follows:
“Both partners skate backwards. Lady’s right hand is in the man’s right hand and her left hand is in his left hand (same arm hold). The lady takes off backwards from an edge or with a toe push and makes one rotation on the ascent of the lift.”

Group 5 Reverse Lasso Lift (5RLi) is defined as follows:
“Both partners skate backwards. Lady’s right hand is in the man’s left hand and her left hand is in his right hand (opposite arm hold). The lady takes off backwards from an edge or with a toe push and makes half a rotation on the ascent of the lift”.
3. Choreographic Sequences consist of any kind of movements such as steps, turns, spirals, arabesques, spread eagles, Ina Bauers, hydroblading, transitional (unlisted) jumps, spinning movements etc. A Choreographic Sequence for Ladies/Pairs must include at least one spiral (not a kick) of any length (by both partners for Pairs). The Sequence commences with the first move and is concluded with the last move of the skater. The pattern is not restricted, but the Sequence must fully utilize the ice surface. If this requirement is not fulfilled, the Sequence will have no value. The Choreographic Sequence is included in Free Skating and for Singles has to be performed after the step sequence. The Choreographic Sequence has a base value and will be evaluated by the judges in GOE only.
